

How to find an authentic journal for submission

Presented by:

Dr. Alireza Abdi

مقدمه

- سوالاتی که در ذهن پژوهشگر است:
- مقاله ام را در چه مجله ای چاپ کنم؟
- آیا مجله معتبر است؟
- مجله چه ایندکسهایی دارد؟
- روند داوری مجله چگونه است؟
- چگونه پاسخ داوری را بدهم؟
-

مجله نامعتبر (predatory)، pseudo-journals

- مجلات بی اعتبار یا نامعتبر به مجلاتی گفته می شود که:
- عملکرد ضعیفی داشته اند
- این مجلات در داوری مقالات بسیار ضعیف بوده اند و می توان گفت پروسه داوری ندارند
- هر نوشته ای را که در قالب مقاله علمی تنظیم شده باشد در مدت زمان کوتاهی مثلا یک هفته پذیرش می کنند
- در واقع تنها پول برای آن ها مهم می باشد

آمار مربوط به مجلات نامعتبر

- [illegible]

- [BEALL'S LIST:](#)
- POTENTIAL PREDATORY JOURNALS AND PUBLISHERS

The screenshot shows a web browser window with the address bar displaying "beallist.net". The website's header features the title "BEALL'S LIST OF POTENTIAL PREDATORY JOURNALS AND PUBLISHERS" in a large, bold, black font. Below the title is a teal navigation bar with the following links: "PUBLISHERS", "STANDALONE JOURNALS", "VANITY PRESS", "CONTACT", and "OTHER". A search bar is positioned below the navigation bar, with the placeholder text "Search for publishers (name or URL)".

The main content area is divided into two columns. The left column is titled "Potential predatory scholarly open-access publishers" and contains the following text:

Instructions: first, find the journal's publisher – it is usually written at the bottom of the journal's webpage or in the "About" section. Then simply enter the publisher's name or its URL in the search box above. If the journal does not have a publisher use the [Standalone Journals](#) list.

All journals published by a predatory publisher are potentially predatory unless stated otherwise.

Original list

This is an archived version of the Beall's list – a list of potential predatory publishers created by a librarian [Jeffrey Beall](#). We will only update links and add notes to this list.

Below this text are two bullet points:

- [1088 Email Press](#)
- [2425 Publishers](#)

The right column is titled "Useful pages" and contains the following links:

- [List of journals falsely claiming to be indexed by DOAJ](#)
- [DOAJ: Journals added and removed](#)
- [Nonrecommended medical periodicals](#)
- [Retraction Watch](#)
- [Flaky Academic Journals Blog](#)

At the bottom of the page, there is a Windows taskbar with various icons, including the Start button, search bar, and several application icons. The system clock in the bottom right corner shows "10:00 PM 9/15/2020".

Beall's criteria for identification of predatory journals and publishers: **Editor and Staff**

- The **publisher's owner** is identified as **the editor of each and every journal** published by the organization.
- **No single individual** is identified as any specific journal's editor.
- The journal does **not** identify a **formal editorial / review board**.
- **No academic information** is provided regarding the **editor**, editorial **staff**, and/or review board members.
- Evidence exists showing that the **editor and/or review board** members do not possess **academic expertise** to reasonably qualify them to be publication gatekeepers in the journal's field.
- **Two or more journals** have duplicate editorial boards (*i.e.*, same editorial board for more than one journal).

Cont. **Editor and Staff**

- The journals have an **insufficient number of board** members (*e.g.*, 2 or 3 members), have concocted editorial boards (made up names), name scholars on their editorial board **without their knowledge or permission**
- have board members who are prominent researchers but exempt them from any contributions to the journal except the use of their names and/or photographs.
- There is little or **no geographical diversity** among the editorial board members, especially for journals that claim to be international in scope or coverage.
- The editorial board engages in **gender bias** (*i.e.*, exclusion of any female members).

Cont. **Business management, the publisher**

- Demonstrates a **lack of transparency** in publishing operations.
- Has no policies or practices for **digital preservation**.
- Begins operations with a **large fleet of journals**, often using a common template to quickly create each journal's home page.
- Provides **insufficient information or hides information** about author **fees**, offering to publish an author's paper and later sending an unanticipated "**surprise**" invoice.

Cont. **Business management, the publisher**

- Does not allow **search engines to crawl the published content**, preventing the content from being indexed in academic indexes.
- Copy-proofs (locks) their PDFs, thus **making it harder to check for plagiarism.**

Cont. **integrity**

- The name of a journal is **incongruent** with the journal's mission.
- The name of a journal **does not adequately reflect its origin** (*e.g.*, a journal with the word “Canadian” or “Swiss” in its name when **neither the publisher, editor**, nor any purported institutional affiliate relates whatsoever to Canada or Switzerland).
- In its spam email or on its website, the publisher falsely **claims one or more of its journals have actual (Thomson-Reuters) impact factors**, or advertises impact factors assigned by fake “impact factor” services, or it uses some made up measure (*e.g.*, view factor), feigning/claiming an **exaggerated international standing**.
- The publisher **sends spam requests for peer reviews** to scholars unqualified to review submitted manuscripts, in the sense that the specialties of the invited reviewers do not match the papers sent to them.

Cont. **integrity**

- The publisher **falsely claims to have its content indexed in legitimate abstracting and indexing services** or claims that its content is indexed in resources that are not abstracting and indexing services.
- The publisher **dedicates insufficient resources to preventing and eliminating author misconduct**, to the extent that the journal or journals **suffer from repeated cases of plagiarism, self-plagiarism, image manipulation**, and the like.
- The **publisher asks the corresponding author for suggested reviewers** and the publisher subsequently uses the suggested reviewers without sufficiently vetting their qualifications or authenticity.

Cont. others

- **Re-publish papers** already published in other venues/outlets without providing appropriate credits.
- • Use **boastful language claiming to be a “leading publisher”** even though the publisher may only be a startup or a novice organization.
- Operate in a **Western country chiefly** for the purpose of functioning as a vanity press **for scholars in a developing country** (e.g., utilizing a mail drop address or PO box address in the United States, while **actually operating from a developing country**).
- Provide **minimal or no copyediting or proofreading** of submissions.
- **Publish papers that are not academic** at all, e.g. essays by lay people, polemical editorials, or obvious pseudo-science.
- Have a “**contact us**” page that only includes a web form or an email address, and the publisher hides or does not reveal its location.

Poor journal standards/ practice (do not equal predatory criteria, but authors should consider these items prior to manuscript submissions)

- The publisher **copies “authors guidelines” verbatim** (or with minor editing) from other publishers.
- The publisher **lists insufficient contact information**, including contact information that does **not clearly state the headquarters location** or misrepresents the headquarters location (*e.g.*, through the use of addresses that are actually mail drops).
- The publisher publishes journals that **are excessively broad** (*e.g.*, Journal of Education) in order to attract more articles and gain more revenue from author fees.
- The publisher publishes journals that **combine two or more fields not normally treated together** (*e.g.*, International Journal of Business, Humanities and Technology).

Cont.

- The publisher **charges authors for publishing** but requires transfer of copyright and retains copyright on journal content.
- the publisher **requires the copyright transfer** upon submission of manuscript.
- The publisher has **poorly maintained websites**, including dead links, prominent misspellings and **grammatical errors on the website**.
- The publisher makes **unauthorized use of licensed images** on their website, taken from the open web, without permission or licensing from the copyright owners.

How can you spot a predatory journal?

- 1. Do you or your colleagues know the journal? Do you recognize the editorial board?
- 2. Can you easily contact the publisher?
- 3. Is the journal clear about their peer review process?
- 4. Is it clear what fees will be charged?

International Journal of Clinical Skills

[eISSN: 1753-0431; NLM Id: 101489572]

Dear Professor ,

I am privileged to contact you through this mail and I hope this is a good time to solicit your kind attention.

Our panel of editorial board, having read your recently published article and it would have immense impact on aspiring health care professionals and your research interests are in consonance with the scope of our Journal.

Article Processing Charges

Publishing with open access is not without costs. Openaccess Journals defrays those costs from article-processing charges (APCs) payable by authors once the manuscript has been accepted for publication. Openaccessjournals does not have subscription charges for its research content, believing instead that immediate, world-wide, barrier-free, open access to the full text of research articles is in the best interests of the scientific community.

The APC charges are 719 Euro.

***50% of the publication charges will be applicable as withdrawal fees once the article is processed.**

The charges would be calculated in USD (For America, Asia, Africa, Australia), Euros (For European countries) and GBP (For United Kingdom).

For Subscription articles the article processing charges (APCs) are:

Pages 1-10..... Euro 90 per page

Pages 11 and above.....Euro 115 per page

Withdrawal Policy

By submission, the author grants the journal right of first publication. Therefore, the journal discourages unethical withdrawal of manuscript from the publication process after peer review.

If authors wish to retract their paper after 7 days of submission, he/she will be labelled to pay 50% of the total expenses on their article as a fee for withdrawal charges. Since, the publication process requires input of Editors, Reviewers, Associate Managing Editors, Editorial Assistants, Content Writers, Editorial Managing System & other online tracking system to ensure that the published article is of good quality and is in its best possible form.

توجه

مجله جعلی (hijacking)

- مجله جعلی یا هایجک شده، به وب سایت هایی گفته می شود که با نام و اعتبار یک ژورنال واقعی شکل گرفته اند و تلاش می کنند تا با فریب نویسندگان مقالات برای رسیدن به اهداف مالی خود فعالیت کنند. درحالی است که صاحبان واقعی مجله از این ماجرا اطلاعی ندارند. اغلب ژورنال هایی که وب سایت رسمی ندارند یا به نحوی وب سایت رسمی آنها ناشناخته یا غیرفعال است در معرض جعل شدن می باشند.
- این افراد سودجود به جستجوی ژورنال هایی می پردازند که در درجه اول در پایگاه های ISI، PubMed – web of science یا Scopus ایندکس شده است و دوم سایت رسمی و موثق ژورنال موجود نیست و یا یافتن آن دشوار می باشد، پس از آن با ساخت سایت جعلی با مشخصات مجله اصلی و تبلیغات گسترده تلاش می کنند نویسندگان بیشتری را تشویق به ارسال مقاله کنند و معمولاً این مقالات را بدون داوری و با دریافت هزینه چاپ معینی چاپ می کنند.

ادامه...

- جامعه هدف مجلات جعلی، اغلب نویسندگان مبتدی و تازه کار کشور های در حال توسعه هستند. در سال های اخیر تاکید شدید آیین نامه های تشویقی بر رشد مقالات بدون تسهیل گری اکادمیک و زمینه سازی لازم بر رشد قارچ گونه این مجلات دامن زده شده است.
- افرادی که به این گونه مجلات مقاله می فرستند دو گروه می باشند. گروهی که به دلیل عدم شناخت مجلات و توانایی ارزیابی مجلات، مقاله خود را برای چاپ ارسال می کنند و گروهی که نسبت به بی اعتبار بودن مجله آگاهی کامل دارند و فقط جهت کسب امتیاز اقدام به چاپ مقاله می نمایند.

Multidisciplinary ISI Journal in All Fields of Sciences

WULFENIA HOMEPAGE

Journal Citation and Publication Information:

- ISSN: 1561-882X
- Impact Factor: 2.000
- Five-Year-IF: 1.262
- Coverage:
 - Elsevier BIOBASE
 - BIOSIS Previews

Wulfenia (ISSN: 1561-882X) is a multi-disciplinary, peer-reviewed international ISI journal for publication of novel ideas, the state-of-the-art research results and fundamental advances in all aspects of theoretical and applied topics in science and engineering including areas in natural and social sciences. The objective of the Wulfenia is to serve a better understanding between the researchers and practitioners from academia and industry. The paper submitted to Wulfenia should describe original and previously unpublished works, not currently under review by another conference, workshop or journal. However, authors can submit the extended version of conference papers. Papers for publication are selected through peer review to ensure originality, relevance, and readability. Upon preliminary evaluation by the Editorial Board, the papers are sent to two referees (experts in respective fields) for evaluation. The decision of the Editor-in-Chief to publish a paper in concurrence with referee(s) opinion is considered final.

[Submit Your Article Here](#)[Paper Template](#)

Wulfenia Sidebar Menu

Submission Guide

Manuscripts submitted for consideration to the journal must conform to the requirements that will facilitate preparation of the article for publication

Editorial Board

The international editorial board is headed by Professor Dr. Vienna S. Franz

General Policies

Papers that are published or held by the Journal may not be published elsewhere

Peer Review Process

Papers will be sent to three peer reviewers for evaluation

Recruitment

We welcome referees who would be willing to act as reviewers

Wulfenia

Mitteilungen des Kärntner Botanikzentrums Klagenfurt

Wulfenia, a scientific journal of the Regional Museum of Carinthia (Austria), is an internationally recognized journal. It is published annually accepting original research studies on plant biology with focus on systematics, taxonomy, floristics, morphology, chorology, vegetation science and paleobotany. Papers must be of interest to a wide audience of plant scientists.

Information for authors

Wulfenia publishes original research studies written in English dealing with botany, giving preference to systematics, taxonomy, floristics, morphology,

Find journals Find authors Find articles

Welcome to Jane

Have you recently written a paper, but you're not sure to which journal you should submit it? Or maybe you want to find relevant articles to cite in your paper? Or are you an editor, and do you need to find reviewers for a particular paper? Jane can help!

Just enter the title and/or abstract of the paper in the box, and click on 'Find journals', 'Find authors' or 'Find Articles'. Jane will then compare your document to millions of documents in *PubMed* to find the best matching journals, authors or articles.

Keyword search

Instead of using a title or abstract, you can also search using a keyword search, similar to popular web search engines. Click [here](#) to search using keywords.

Beware of predatory journals

JANE relies on the data in PubMed, which can contain papers from predatory journals, and therefore these journals can appear in JANE's results. To help identify high-quality journals, JANE now tags journals that are currently indexed in MEDLINE, and open access journals approved by the Directory of Open Access Journals (DOAJ).

[Additional information about Jane](#)

Journal Selector

Use the options below to find journals that match your requirements. The journals included in the tool are listed at the bottom of the page. Change the options for any of the questions and click Search. The journals list will update to give only the journals that fit your criteria. Click on a journal name for more information about it.

An explanation of the various options and abbreviations is [here](#), or click on the question marks on the right.

Manuscript Transfer Program

Wiley Open Access Manuscript Transfer Policy

A number of Wiley Open Access journals participate in a Manuscript Transfer Program. After review in a supporting journal, rejected articles of suitable quality can be identified by the Editor as candidates for publication in a Wiley Open Access journal. Authors will have the option to automatically transfer their manuscript to the Wiley Open Access journal and complete the submission process. The Wiley Open Access journal will then undertake further editorial evaluation. Importantly, authors will not need to make any changes to their manuscript at this stage. Authors should note that referees' comments are transferred to the editor of the Wiley Open Access journal along with the manuscript. The journal editors will take the previous reviews into account when making their decision, although in some cases the editors may choose to take advice from additional referees.
