

آشنایی با پایگاه اطلاعاتی CLINICALKEY

• تهیه کننده: شهاب چهری

• کارشناس ارشد اطلاع رسانی پزشکی

- **Clinicalkey** از محصولات انتشارات بزرگ Elsevier است که تنها یک موتور جستجوی بالینی معمولی و متداول نیست بلکه یک موتور جستجوی بالینی هوشمند و یک پایگاه اطلاعاتی شامل کتاب ، ژورنال ، تصویر ، مولتی مدیا ، اطلاعات دارویی و .. می باشد که جهت پاسخگویی به نیازهای اطلاعاتی پزشکان در آپریل 2012 به شکل ویژه ای طراحی شده است : ویژگیهای منحصر بفرد این پایگاه عبارتند از:
- **جامعیت** : clinicalkey سوالات شما را از طریق بزرگترین مجموعه منابع پزشکی منتشرشده در همه حوزه های تخصصی پزشکی و جراحی پاسخ می دهد. همچنین در برگیرنده همه چکیده های medline است .
- **مورد اعتماد**: دارای محتوا و جوهره معتبر و قابل اطمینان در حوزه پزشکی و جراحی
- **سرعت در پاسخگویی**: محتوای هوشمند ، clinicalkey قادر می سازد تا مرتبط ترین پاسخ ها را در سریع ترین زمان ممکن ارائه کند.

- این مجموعه حاوی :
- بیش از 500 عنوان مجله پزشکی و جراحی از انتشارات **Elsevier**
- بیش از 1100 عنوان کتب مرجع پزشکی و جراحی
- مجموع کامل 57 عنوان مجله از مجلات **Clinics of north America**
- آموزش بیش از 350 تکنیک جراحی و 450 عنوان شرح عمل جراحی
- مقالات بالینی و شرح بیماریهای مبتنی بر شواهد بیش از 750 بیماری
- دسترسی به بیش از 15000 راهنمای آموزش بیمار
- حدود 13000 ویدیو پزشکی
- حدود 5000000 تصویر پزشکی
- بیش از 4000 راهنمای عملی بالینی
- اطلاعات بیش از 2900 دارو که توسط شرکت **Gold standard** فراهم شده و به روزرسانی می شود.
- 20 میلیون خلاصه مقاله مدلاین که به صورت روزانه از کتابخانه ملی پزشکی به این مجموعه اضافه می گردد.

BOOK CHAPTER

Office practice of plastic surgery 📄

Gustavo A. Colon

Aesthetic Plastic Surgery, CHAPTER 1, 1-13

Part 1: Introduction of the practice needs

Initial steps

The staff

Part 2: Marketing and practice enhancement

How I market an aesthetic practice

Why do patients come to you?

The initial consultation

Patient characteristics

Handling the patient postop

The difficult and unhappy

Part 1: Introduction of the practice needs

Initial steps

Before establishing a practice, you have to decide where it is that you want to live. However, deciding on an urban, suburban, or rural area may be somewhat difficult. The first thing that one has to evaluate is the number of plastic surgeons who are practicing within the community. It would be very difficult to establish yourself in an area where there are multiple plastic surgeons who already have appropriate referral sources, and it is best to look for a community in which there is a definite need for a plastic surgeon, either with a group or in solo practice or even in academic medicine.

The location

Before you finish training, you should investigate the area in which you are interested. Look at demographics, population growths, median incomes, growth of the city and/or community, and

Infections in the Elderly

دسترسی به فولتکست

Kent B. Crossley and Phillip K. Peterson

Mandell, Douglas, and Bennett's Principles and Practice of Infectious Diseases, 315, 3459-3465.e3

Keywords

bacteremia, decubitus, elderly, enterohemorrhagic *Escherichia coli*, herpes zoster, influenza, pneumonia, tuberculosis, urinary tract infection, West Nile virus

Short View Summary

GENERAL CONSIDERATIONS

- People living past 65 years of age are rapidly increasing in number.
- Individuals older than age 65 years have a higher incidence of most infections than do younger people.
- For nearly all infections, clinical manifestations are more subtle in the elderly.

URINARY TRACT INFECTION

- Asymptomatic bacteriuria should not be treated.
- Symptomatic infection is often caused by organisms other than *Escherichia coli*.
- Extended-duration therapy (i.e., >7 days) of symptomatic infection is not needed in either men or women.

FULL TEXT ARTICLE

Regulatory development of geriatric medicines: To GIP or not to GIP?

Bart De Spiegeleer, Evelien Wynendaele, Nathalie Bracke, Lieselotte Verysen, Lien Taevernier, Agnes Degroote and Sofie Stalmans

Ageing Research Reviews, 2016-05-01, Volume 27, Pages 23-36, Copyright © 2016 Elsevier B.V.

Graphical abstract

The diagram illustrates the regulatory development of geriatric medicines. It shows a flow from the Pharmaceutical Industry to Regulatory authorities, then to Healthcare Providers, and finally to Pediatric Patients, Adults, and Geriatric Patients. The diagram also shows the progression from Pediatric Investigation Plan (PIP) to Current clinical trials to Current drugs, and finally to Geriatric Investigation Plan (GIP). A question mark is placed next to the Geriatric Investigation Plan (GIP) box, indicating a point of uncertainty or a question about its implementation.

Highlights

- There is lack of knowledge on the benefit/risk ratio of medicines in the elderly.

DRUG MONOGRAPH

Acetaminophen

⊞ Acephen | Aceta | Actamin | Anacin Aspirin Free | Apra ...

Drug Information Provided By Gold Standard

Description: Acetaminophen (APAP, paracetamol) is a para-aminophenol analgesic and the active metabolite of phenacetin. Due to the toxic effects of phenacetin at therapeutic doses and the availability of acetaminophen, phenacetin is no longer used. Acetaminophen possesses analgesic and antipyretic activity similar to aspirin; however, acetaminophen has no peripheral antiinflammatory activity or effects on platelet function. Acetaminophen was first used in clinical medicine in the 1890's. It is effective in the relief of both acute and chronic pain and may be preferred over NSAIDs due to fewer hematologic, GI, and renal effects. Acetaminophen is the preferred analgesic/antipyretic for patients in whom aspirin is contraindicated and in those with underlying renal disease for episodic, though not chronic, use.²³⁹⁷⁷ In addition, acetaminophen has been recommended by the American Lung Association as the first line treatment for aches and pains associated with the flu, by the American Geriatrics Society for both minor and persistent pain in elderly patients³⁵⁶¹⁴, and by the American College of Rheumatology as first-line therapy for osteoarthritis of the hip or knee³⁵⁶⁷⁶. The drug has a history of safe and effective use; however, unintentional or intentional misuse of acetaminophen is the number one cause of acute hepatic failure in the U.S.³²²⁰² Acetaminophen was first approved by the FDA in 1950. Intravenous acetaminophen (Ofirmev) was approved by the FDA in November 2010 for the treatment of pain and fever in adults, adolescents, and children over the age of 2 years.⁴²²⁸⁹

Mechanism of Action: The exact mechanism of action is unknown, but acetaminophen is thought to mediate its actions centrally through activation of the descending serotonergic pathways. Acetaminophen is believed to increase the pain threshold by inhibiting prostaglandin (PG) synthesis through the cyclooxygenase (COX) pathway, similar to nonsteroidal anti-inflammatory drugs (NSAIDs). Though

چنانچه به دنبال جستجوی دارو برای درمان بیماری خاصی هستیم نیز نام بیماری در کادر جستجو نوشته شده و محتوا بر روی DRUG MONOGRAPHS قرار می گیرد. بطور مثال بیماری میگرن در کادر نوشته شده و جستجو می گردد.

Help & Feedback

8:29 AM 3/9/2016

تعداد نتایج 69 مورد است. با کلیک بر روی نتیجه مورد نظر ، اطلاعات دارویی آن نشان داده خواهد شد .

The screenshot shows the ClinicalKey website interface. At the top, there's a search bar with the text 'migraine - ClinicalKey Search'. Below the search bar, the results are filtered by 'Source Type' and 'Date'. The results list includes several drug monographs:

- Acetaminophen**: Gold Standard. Published December 20, 2015.
- Aspirin, ASA**: Gold Standard. Published February 25, 2016.
- Ibuprofen**: Gold Standard. Published January 5, 2016.
- Aspirin, ASA; Calcium Carbonate; Magnesium Oxide; Magnesium Carbonate**: Gold Standard. Published April 23, 2008.
- Belladonna; Caffeine; Ergotamine; Pentobarbital**: Gold Standard. Published June 24, 2015.
- Aspirin, ASA; Aluminum Hydroxide; Calcium Carbonate; Magnesium Hydroxide**: Gold Standard. Published April 23, 2008.

On the right side, there's a section titled 'Migraine Headache' with a 'View Full Topic' link. Below this, the 'Definition' section explains that migraine headaches are recurrent headaches that are either preceded by a focal neurologic symptom (migraine with aura), occur independently without preceding focal neurologic symptoms (migraine without aura), or have atypical presentations (migraine variants). The migraine aura typically is characterized by visual or sensory symptoms that develop over 5 to 60 min. If aura includes motor weakness, the migraine is referred to as hemiplegic. In migraine with and without aura, the headache is typically unilateral, pulsatile, and associated with nausea and vomiting, photophobia, and phonophobia. Migraines that occur ≥ 15 days every month for ≥ 3 months are known as chronic; otherwise, they are referred to as episodic.

At the bottom right, there's a 'Genetics' section with a 'Continue Reading' link. The footer of the page includes the text 'Was this helpful? Yes or No'.

Asthma across the ages: Knowledge gaps in childhood asthma

Journal of Allergy and Clinical Immunology, The.

Szefer, Stanley J., MD; Chmiel, James F., MD, MPH... [Show all...](#) Published January 1, 2014. Volume 133, Issue 1. Pages 3-13. © 2013.

Fig 1 Airway inflammation in the setting of asthma. The orange box represents activities in the lymph node. The dendritic cell (DC) processes antigens, migrates to the lymph nodes, and associates with TH 0, which then differentiates and migrates back to the airway. A, Noneosinophilic/neutrophilic asthma, B, Eosinophilic asthma. Remodeling occurs in patients with all forms of asthma but is only shown in Fig 1, B. EPO, Eosinophil peroxidase; ICAM-1, intercellular adhesion molecule 1; LTB₄, leukotriene B₄; Mφ, macrophage; MBP, major basic protein; MMP, matrix metalloproteinase; PAF, platelet-activating factor; Treg, regulatory T cell; TSLP, thymic stromal lymphopoietin.

Conn's Current Therapy 2016 · Bope, Edward T., MD; Kellerman, Rick...

Epidemiology

Asthma prevalence in the United States has been on the rise since the 1990s. It is currently estimated that 9.6% of children younger than 18 years (7.1 million children) carry the diagnosis of asthma. Male sex, African American or Puerto Rican ethnicity, and lower socioeconomic status are associated with an increased risk of developing asthma. Prevalence estimates for these groups are as high as 11% to 16%.

Asthma has a significant impact on both school attendance and health care expenditures. According to the National Health Statistic Report in 2007, children made 640,000 emergency department visits and were hospitalized 157,000 times as a result of asthma. In 2008 it was estimated that there were 10.5 million missed school days, and about 5% of children reported long-term limitations on their usual activities due to asthma symptoms.

GUIDELINES

راهنماها

برای پیدا کردن راهنماهای بالینی از قسمت GUIDELINES استفاده می کنیم. به عنوان مثال یک راهنما در مورد نحوه رفتار با بیمار مبتلا به پارکینسون می خواهیم

The screenshot shows the ClinicalKey website interface. At the top, there's a navigation bar with the ClinicalKey logo, language options (English), and links for CME, Login, and Register. Below this is a search bar with the text "Guidelines Parkinson disease" and a "Back to results" link. The main content area is titled "GUIDELINE Parkinson's disease in over 20s: diagnosis and management (CG35)" and is attributed to the National Institute for Health and Care Excellence (NICE). A large green arrow points to the word "GUIDELINE". The left sidebar contains a table of contents with links to various sections: Introduction, Patient-centred care, Key priorities for implementation, 1 Guidance, 2 Notes on the scope of the guidance, 3 Implementation in the NHS, 4 Research recommendations, 5 Other versions of this guideline, 6 Related NICE guidance, 7 Review date, Appendix A: Grading scheme, Appendix B: The Guideline Development Group, Appendix C: The Guideline Review Panel, and Appendix D: Technical detail on the criteria for audit. The main text area starts with an "Introduction" section, followed by a paragraph about Parkinson's disease (PD) and its diagnosis. A "Health and resource implications" section is also visible at the bottom.

GUIDELINE Parkinson's disease in over 20s: diagnosis and management (CG35)

National Institute for Health and Care Excellence (NICE)

Introduction

Parkinson's disease (PD) is a progressive neurodegenerative condition resulting from the death of the dopamine-containing cells of the substantia nigra. There is no consistently reliable test that can distinguish PD from other conditions that have similar clinical presentations. The diagnosis is primarily clinical, based on a history and examination.

People with PD classically present with the symptoms and signs associated with parkinsonism, namely bradykinesia, rigidity and rest tremor.

Parkinsonism can also be caused by drugs, and conditions that are less common than PD. These include multiple cerebral infarction and degenerative conditions such as progressive supra-nuclear palsy (PSP) and multiple system atrophy (MSA).

Although PD is predominantly a movement disorder, other impairments frequently develop including psychiatric problems such as depression and dementia. Autonomic disturbances and pain (which is rarely a presenting feature of PD) may later ensue, and the condition progresses to cause significant disability and handicap with impaired quality of life for the affected person. Family and carers may also be affected indirectly.

Health and resource implications

PD is a common, chronic, progressive neurological condition, estimated to affect 100–180 people per

Pancreatic Cancer
Disease Overview View Full Topic
Goldman-Cecil Medicine · Goldman, Lee, MD; Schafer, Andrew I., MD

◆ **Definition**
Pancreatic cancer usually refers to ductal adenocarcinomas of the pancreas, because more than 90% of pancreatic tumors arise from the ductal epithelium. Other major tumors of the pancreas include endocrine malignancies (Chapter 195), carcinoid tumors (Chapter 232), lymphomas (Chapter 185), and a variety of rare sarcomas.

◆ **Epidemiology**
Pancreatic ductal adenocarcinoma (PDAC) has one of the highest incidence-to-mortality ratios of any disease. Although it represents the tenth leading cause of cancer in the United States, it is the fourth leading cause of cancer-related deaths, ¹ because the vast majority of patients will die from their disease. Annually, approximately 40,000 individuals will die in the United States from PDAC or its complications. The

CLINICAL TRIAL

Safety Study of Nivolumab With Nab-Paclitaxel Plus or Minus Gemcitabine in Pancreatic Cancer, Nab-Paclitaxel / Carboplatin in Stage IIIB/IV Non-Small Cell Lung Cancer or Nab-Paclitaxel in Recurrent Metastatic Breast Cancer

First received on December 3, 2014. Last updated on March 30, 2016.

Purpose

The purpose of this study is to assess safety of nab-paclitaxel based chemotherapy regimens administered prior to and/or in combination with nivolumab in Pancreatic Cancer, Non Small Cell Lung Cancer (NSCLC) and Metastatic Breast Cancer (mBC).

Status	Recruiting
Condition	Breast Neoplasms
Phase	Phase 1
Study Type	Interventional
Study Design	Allocation: Randomized, Endpoint Classification: Safety Study, Intervention Model: Parallel Assignment, Masking: Open Label, Primary Purpose: Treatment
Official Title	A Phase 1, Open-label, Multicenter, Safety Study of Nivolumab (Bms-936558) in Combination With Nab-paclitaxel Plus or Minus Gemcitabine in Pancreatic Cancer, Nab-paclitaxel/Carboplatin in Stage IIIB/IV Non-small Cell Lung Cancer or Nab-paclitaxel in
