مقدمه

- ▶ اندنوت محصولی از شرکت تامسون رویترز است.
- ▶ برای ذخیره سازی و سازمان دهی منابع مورد استفاده در روند پژوهش، به کار میرود.
- ▶ میتوان منابعی را که برای نوشتن پروپوزال، پایان نامه، مقاله کتاب و مورد استفاده قرار گرفته است مدیریت و آنها را در یک فرمت نوشتاری استاندارد ذخیره کرد.

مقدمه

Injuries are the leading cause of death between the ages of 15 to 44 years [1] and Traumatic Brain Injury (TBI) is the major cause of disability, morbidity and mortality among this group[2], which is responsible for a significant proportion of all traumatic deaths[3].

Most TBI cases were as a result of falls, mechanical forces[4], transport accidents and assaults that impose many related health care costs to patients and their families[5]. The incidence of TBI is rising worldwide, mainly owing to injuries associated with the increased use of motor vehicles[6]. Accordingly, the results of a meta-analysis on 23 European countries revealed a hospital admission incidence of 235 TBI patients per 100,000 people[7].

In the USA also, there are around 275,000 hospitalizations and 52,000 fatalities[4,6,8,9,10].
