Introduction to PubMed

- PubMed is the publicly available version of MEDLINE that is provided free of charge by the National Library of Medicine at <http://www.ncbi.nlm.nih.gov/entrez/query.fcgi?db=PubMed>.pubMed
- PubMed.com

Why should you use PubMed?

- ▶ PubMed contains all citations from the medical literature back to 1953
 - ▶ PubMed is updated daily directly from publishers
 - ▶ PubMed links directly to the home pages of the journals
- 

What is PubMed?

- ▶ offers many different search options for non- and professional researchers
- ▶ It is the best medical database of its kind in the world

Why should you use PubMed?

- ▶ **Over 4,600 medical journals are indexed yearly**
- ▶ **Newspapers, life science journals, nursing journals, and medical management journals, and others are all covered in PubMed.**

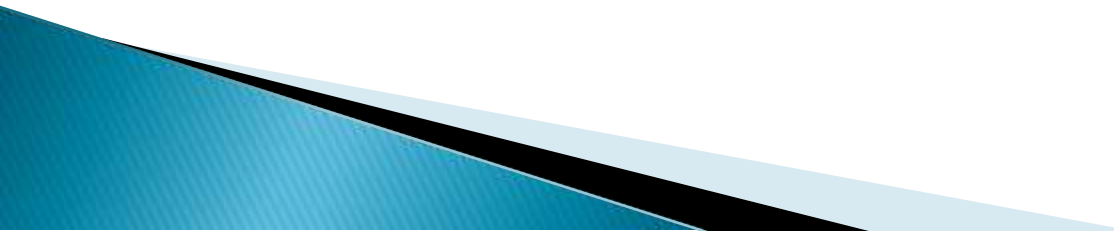

What is PubMed?

Offers access to...

- ▶ Journals from peripheral areas of medicine
- ▶ Non-medical articles in Medline journals
- ▶ References to journal full texts

What is PubMed?

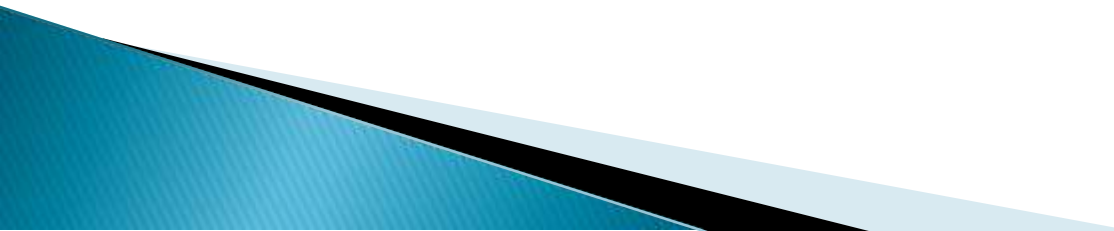

▶ Covers

- Medicine
 - Nursing
 - Dentistry
 - Veterinary medicine
 - Healthcare systems
 - Preclinical sciences
- 

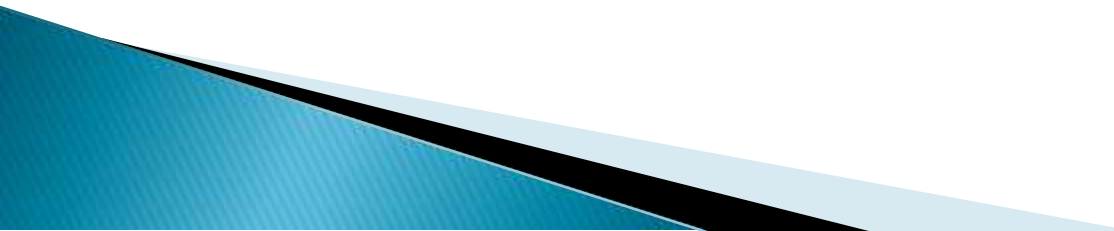

Where to start when you need information?

- Start with PubMed - all the time

What Can You Do in PubMed?

- ▶ Search for articles (usually abstracts)
 - By keyword
 - By author
 - By Journal, etc
 - ▶ Combine searches
 - ▶ Link to related articles
- 

What Can You Do in PubMed?

- ▶ Link to outside sources
 - To purchase the full article
 - Look at **related books** (including pages in the books)
 - ▶ Clinical queries
-

Results by year

The bar chart shows the number of results per year from 2000 to 2012. The x-axis represents years, and the y-axis represents the number of results. The number of results starts low in 2000 and increases steadily over the years, reaching its highest point in 2012.

Step 4: Conduct a literature search and change the display format of your research results to Abstract.

1. Click on Display Settings

Spell check

The screenshot shows the PubMed website interface. At the top, there is a navigation bar with 'NCBI Resources' and 'How To' links, and a 'Sign in to NCBI' button. The main search area features the PubMed logo, a search box containing the text 'cancer', and a 'Search' button. Below the search box, there are links for 'RSS', 'Save search', and 'Advanced'. On the right side, there is a 'Help' link.

The search results section is divided into several columns. On the left, there are filters for 'Text availability' (Abstract available, Free full text available, Full text available) and 'Publication dates' (5 years, 10 years, Custom range...). Below these are 'Species' filters (Humans).

The main results area shows 'Display Settings: Summary, 20 per page, Sorted by Recently Added' and 'Send to: Filters: Manage Filters'. A yellow highlight indicates a spell check suggestion: '★ Did you mean: cancer (2704732 items)'. Below this, the results are listed as 'Results: 15'. The first result is 'Management of Patients with Chronic Pelvic Pain Associated with Endometriosis Refractory to Conventional Treatment' by Martínez B, Canser E, Gredilla E, Alonso E, Gilsanz F. The article is from 'Pain Pract. 2012 May 8. doi: 10.1111/j.1533-2500.2012.00659.x. [Epub ahead of print]' with PMID: 22568860. A link for 'Related citations' is provided.

On the right side, there are two sections: '1 free full-text article in PubMed Central' with a link to 'miRExpress: analyzing high-throughput sequencing data for p [BMC Bioinformatics. 2009]' and 'Find related data' with a 'Database: Select' dropdown menu and a 'Find items' button.

Suggestion Keywords

The image shows a screenshot of a PubMed search interface. At the top left, there is a dropdown menu set to 'PubMed'. To its right is a search input field containing the text 'CANCER'. A dropdown menu is open below the search field, displaying a list of suggested keywords, each highlighted in yellow. The suggestions are: 'cervical cancer', 'bladder cancer', 'neck cancer', 'cancer cell', 'thyroid cancer', 'cancer screening', 'cancer risk', 'cancer stem cell', and 'cancer stem cells'. To the right of the search input field is a blue 'Search' button. Below the search input field, there is a 'Turn off' button. The background of the page shows a partial view of a search result, including the text 'ract', '5):735-8. doi: 10.5535/arm', 'ally Presenting C', 'SJ, Kang JK, Cho EH.', 'e and Rehabilitation, Colle', 'ommonest endocrinolo', 'bological subtype. Comr', and 'gnosed with thyroid ca'. On the right side of the page, there is a 'Favorites' section and a list of search results, including 'ons in Pu', 'skeletal m', 'ary thyroid', 'ed thyroid', and 'shimoto's'.

BMC Med Educ. 2009 Jul 10;9:41.

The effectiveness of web-based and face-to-face continuing education methods on nurses' knowledge about AIDS: a comparative study.

Khatony A, Naveny ND, Ahmadi F, Haqhani H, Vehvilainen-Julkunen K.
PhD Department, School of Nursing & Midwifery, Tehran University of Medical Sciences, Tehran, Iran. akhatony@gmail.com

Abstract

BACKGROUND: Information about web-based education outcomes in comparison with a face-to-face format can help researchers and tutors prepare and deliver future web-based or face-to-face courses more efficiently. The aim of this study was to compare the effectiveness of web-based and face-to-face continuing education methods in improving nurses' knowledge about AIDS.

METHODS: A quasi-experimental method was used with a pre-test and post-test design. In this study 140 nurses with BSc degrees were chosen through a random sampling method and divided into a web-based and a face-to-face group by random allocation. For the former group the intervention consisted of a web-based course on AIDS; the latter received a 3-hour lecture course on the same subject. At the beginning and end of the course in both groups, the nurses' knowledge was measured by a questionnaire. Pre- and post-test scores were compared within and between the groups.

RESULTS: The results show that there was no significant difference between the groups in either the pre-test ($t(138) = -1.7, p = 0.096$) nor the post-test ($t(138) = -1.4, p = 0.163$) scores in the knowledge test. However, there was a significant difference in the pre-test and post-test scores within each group (web-based, $t(69) = 26, p < .001$; face-to-face, $t(69) = 24.3, p < .001$).

CONCLUSION: The web-based method seems to be as effective as the face-to-face method in the continuing education of nurses. Therefore, the web-based method is recommended, as complementary to the face-to-face method, for designing and delivering some topics of continuing education programs for nurses.

Thyroid Cancer Initially Presenting Compression Fracture without Common Thyroid Symptoms.

Kim DH, Yoo SD, Kim SM, Im SJ, Kang JK, Cho EH.

Department of Physical Medicine and Rehabilitation, College of Medicine, Kyung Hee University, Seoul 130-701, Korea.

Abstract

Thyroid carcinoma is the commonest endocrinological malignancy. After papillary thyroid carcinoma (PTC), follicular thyroid carcinoma (FTC) is the second most common histological subtype. Common presentations of FTC include a solitary thyroid nodule and cervical lymphadenopathy. The incidence of individuals diagnosed with thyroid cancer showing initially distant metastatic disease ranges from 1 to 9%. Also, the incidence of solitary bone metastasis from thyroid is only 2 to 3%. We report a case of a patient with FTC whose initial presentation was low back pain and right buttock pain due to vertebral metastasis rather than the usual neck lumps or symptoms of thyroid disease.

 - ▶ Hamburger: 2494
 - ▶ Salmonella AND Hamburger: 12
- 

AND

Example: salmonella AND hamburger

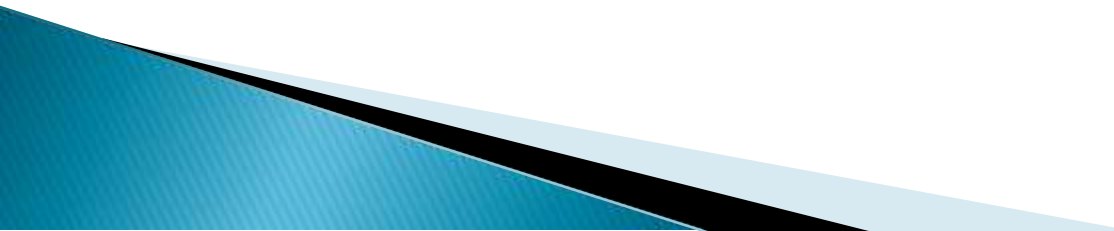

Nesting

- ▶ When using multiple Boolean operators in PubMed, they are processed left to right.
- ▶ **Example:** *salmonella AND hamburger OR eggs*
- ▶ This will retrieve records that include both terms *salmonella AND hamburger* as well as all records with the term *eggs*, whether or not they contain the other two terms.

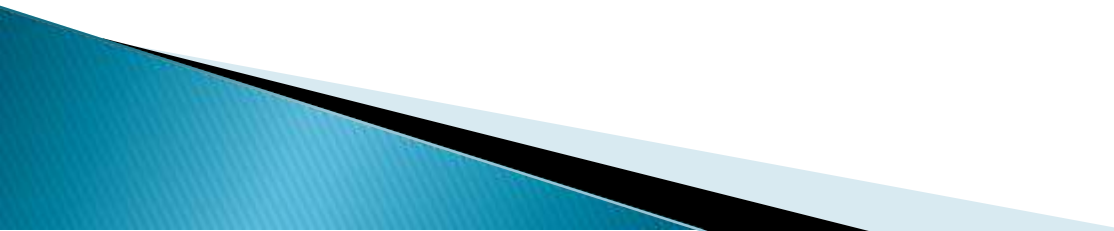

*salmonella AND hamburger OR
eggs*

Nesting

- ▶ To change the order in which terms are processed, enclose the term(s) in parentheses. The terms inside the set of parentheses will be processed as a unit and then incorporated into the overall strategy. **This is called nesting.**
- 

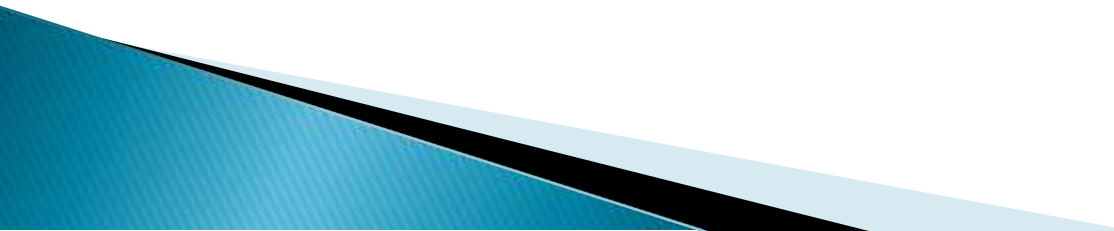

Nesting

- ▶ This will retrieve records that contain the term *salmonella*, as well as one or both of the terms *hamburger* OR *eggs*.
 - ▶ *salmonella AND (hamburger OR eggs)*
- 

salmonella AND (hamburger OR eggs)

Review

- ▶ Boolean operators: AND, OR, and NOT
 - ▶ AND, OR and NOT must be entered in UPPERCASE.
 - ▶ AND is the default operator used in PubMed. If you do not include Boolean operators in your search, PubMed will automatically use AND between terms.
 - ▶ PubMed processes Boolean connectors in a left-to-right sequence.
 - ▶ You can change the order in which PubMed processes a search statement by enclosing, that is nesting, an individual concept in parentheses. The terms inside the parentheses will be processed as a unit and then incorporated into the overall strategy
-

[Diabetes Mellitus](#)

1. A heterogeneous group of disorders characterized by HYPERGLYCEMIA and GLUCOSE INTOLERANCE.

[Diabetes Insipidus](#)

2. A disease that is characterized by frequent urination, excretion of large amounts of dilute URINE, and excessive THIRST. Etiologies of **diabetes insipidus** include deficiency of antidiuretic hormone (also known as ADH or VASOPRESSIN) secreted by the NEUROHYPOPHYSIS, impaired KIDNEY response to ADH, and impaired hypothalamic regulation of thirst.

[Diabetes Mellitus, Type 2](#)

3. A subclass of **DIABETES MELLITUS** that is not INSULIN-responsive or dependent (NIDDM). It is characterized initially by INSULIN RESISTANCE and HYPERINSULINEMIA; and eventually by GLUCOSE INTOLERANCE; HYPERGLYCEMIA; and overt **diabetes**. Type II **diabetes mellitus** is no longer considered a disease exclusively found in adults. Patients seldom develop KETOSIS but often exhibit OBESITY.
Year introduced: 2005 (1984)

[Diabetes Mellitus, Type 1](#)

4. A subtype of **DIABETES MELLITUS** that is characterized by INSULIN deficiency. It is manifested by the sudden onset of severe HYPERGLYCEMIA, rapid progression to DIABETIC KETOACIDOSIS, and DEATH unless treated with insulin. The disease may occur at any age, but is most common in childhood or adolescence.
Year introduced: 2005 (1984)

Evidence for the chylomicron origin of lipids accumulating in diabetic eruptive xanthomas: a correlative lipid biochemical, histochemical, and electron microscopic study.

[Parker F](#), [Bagdade JD](#), [Odland GF](#), [Bierman EL](#).

Abstract

Plasma lipoprotein alterations in nine insulin-dependent diabetics with hyperlipemia have been related to the lipid accumulating in eruptive xanthomas evolving in these patients. Histochemical and electron microscopic examination of xanthomas have been correlated with the lipid analyses in order to obtain additional evidence regarding the lipoprotein origin of lipids accumulating in the lesions. Both analytical and morphologic evidence suggested that circulating chylomicrons significantly contribute to the xanthoma lipids. All the patients had large quantities of circulating triglyceriderich chylomicrons which carried approximately 70% of the triglyceride found in the plasma. The fatty acid pattern of chylomicron and xanthoma triglycerides

Search by Field

The screenshot displays the PubMed website interface. At the top left is the PubMed logo and the text "US National Library of Medicine National Institutes of Health". A search bar contains the text "PubMed" and a dropdown arrow. To the right of the search bar are links for "Limits" and "Advanced", with a red arrow pointing to the "Advanced" link. Below the search bar is a large banner image of a book with a mouse cursor over it. To the right of the banner is a dark blue box with the text "PubMed" and a description: "PubMed comprises more than 21 MEDLINE, life science journals, a to full-text content from PubMed C". Below the banner are two columns of links. The left column is titled "Using PubMed" and contains links for "PubMed Quick Start Guide", "Full Text Articles", "PubMed FAQs", "PubMed Tutorials", and "New and Noteworthy" with an RSS icon. The right column is titled "PubMed Tools" and contains links for "PubMed Mobile", "Single Citation Matcher", "Batch Citation Matcher", "Clinical Queries", and "Topic-Specific Queries".

[Ann Rehabil Med](#). 2012 Oct;36(5):735-8. doi: 10.5535/arm.2012.36.5.735. Epub 2012 Oct 31.

1. [Thyroid Cancer Initially Presenting Compression Fracture without Common Thyroid Symptoms.](#)

Kim DH, Yoo SD, Kim SM, Im SJ, Kang JK, Cho EH.

Department of Physical Medicine and Rehabilitation, College of Medicine, Kyung Hee University, Seoul 130-701, Korea.

Abstract

Thyroid carcinoma is the commonest endocrinological malignancy. After papillary thyroid carcinoma (PTC), follicular thyroid carcinoma (FTC) is the second most common histological subtype. Common presentations of FTC include a solitary thyroid nodule and cervical lymphadenopathy. The incidence of individuals diagnosed with thyroid cancer showing initially distant metastatic disease ranges from 1 to 9%. Also, the incidence of solitary bone metastasis from thyroid is only 2 to 3%. We report a case of a patient with FTC whose initial presentation was low back pain and right buttock pain due to vertebral metastasis rather than the usual neck lumps or symptoms of thyroid disease.

PMID: 23185742 [PubMed - in process]
